

## SPEEDLINGUA PROFESSIONAL NETWORK

### *Learners who can speak and understand effortlessly!*

**Speedlingua Professional Network**, the multi-station software that facilitates and accelerates the learning of languages thanks to its innovative, exclusive, patented technology.

The **administrator mode** enables the instructor to follow or/and to tutor his learner(s). Within your training offers, Speedlingua Professional Network integrates itself to all your programs thanks to its specific functions:

- An unlimited number of users
- All the languages proposed
- An unlimited usage

**Moreover, Speedlingua Professional Network enables your learners to :**

- Develop their oral expression and become fluent
- Considerably improve their comprehension
- Rapidly make progress

Speedlingua Professional Network is a true in situ immersion and adapts itself to the learner's level and rhythm, as well as to his particular needs.

The **client mode** contains more than 5000 words and sentences, especially conceived for audio-phonology improvement. They are categorized in 4 exercise types :

- Phonetic
- General
- Thematic
- Free speech

### *Personal progress is visible after only 12 learning sessions of 45 min*

Speedlingua Professional Network is a simple and intuitive software that enables the learner to improve in the following languages: **American English, British English, German, Chinese, Spanish, French, Italian, Dutch and the International Aviation Language.**

Speedlingua Professional Network is available in 8 interface languages: **German, English, Chinese, Spanish, French, Italian, Japanese, Dutch.**

**The use of a USB headset is essential for an optimum performance of Speedlingua software.**

**Speedlingua process "opens your ear" to the dominant frequencies of the language you are learning and modifies your voice in real time.**

*Speedlingua technology is based on the scientific audio-phonology rules:*

*"The voice can reproduce only what the ear hears perfectly"*

*"If the hearing is modified, then the pronunciation is unconsciously and naturally modified as well."*

*"A lasting phonation modification can be achieved through repeated auditory stimulation"*

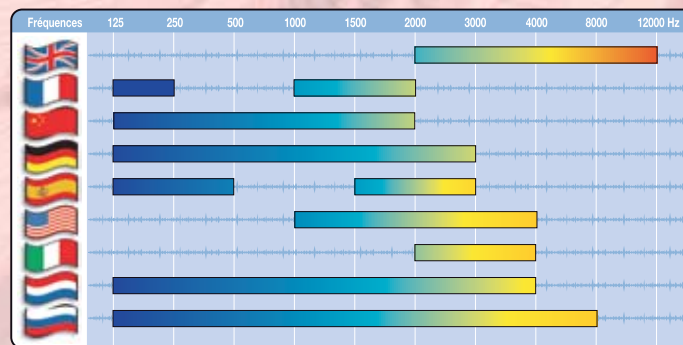

**PATENTED  
EXCLUSIVE  
TECHNOLOGY**

# SPEEDLINGUA™

THE LANGUAGE LEARNING ACCELERATOR

Did you know that every language stands out because of its main frequencies?

## SPEEDLINGUA METHOD

A unique revolutionary software that “opens your ear” to the dominant frequencies of the language you are learning and modifies your voice in REAL TIME.

①

### LISTENING

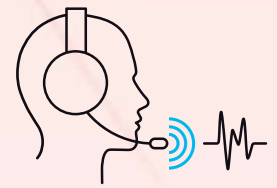

You listen to a native speaker of a selected language

②

### PRONUNCIATION AND SIMULTANEOUS LISTENING

While repeating, you will immediately hear your voice, already adapted to the correct frequencies of the selected language. Speedlingua technology has modified and incorporated in REAL TIME your pronunciation according to the frequencies of the selected language.

③

### RESULTS

Spectacular progress thanks to the continuous stimulation of your ear to the specific frequencies of a selected language.
